What is a Community Health Improvement Plan (CHIP)?

A community health improvement plan (CHIP) describes how the health department and its partner communities will work together to improve the health of its residents. In order to understand what the health issues are, the CHIP is usually preceded by a Community Health Assessment (CHA). The CHA provides the most current and reliable information about the health status of a community and where gaps may exist in achieving optimal health. However, data alone is not enough. Communities are made up of people who have valuable insights about health issues and identified needs. They also are very knowledgeable about community assets, resources, and strengths. A CHIP takes the data from the CHA along with input from community members to determine what the most important issues the health department, community partners and residents will work on together.

Figure 1: The Community Health Improvement Plan Process

Franklin County Overview

Franklin County, Ohio is located in the central part of the state with a population of approximately 1.2 million people. There are 16 cities, 9 villages, and 17 townships, including the county seat, Columbus, Ohio. The city of Columbus is the largest in the state of Ohio and has a population of approximately 750,000 people. Franklin County Public Health serves a population of approximately 422,640 people.

Reynoldsburg	Plain	
Upper Arlington	Pleasant	
Westerville	*Prairie	
*Whitehall	Sharon	
	Truro	

**Jurisdiction has a CHAT*
***Jurisdiction is currently forming a CHAT*

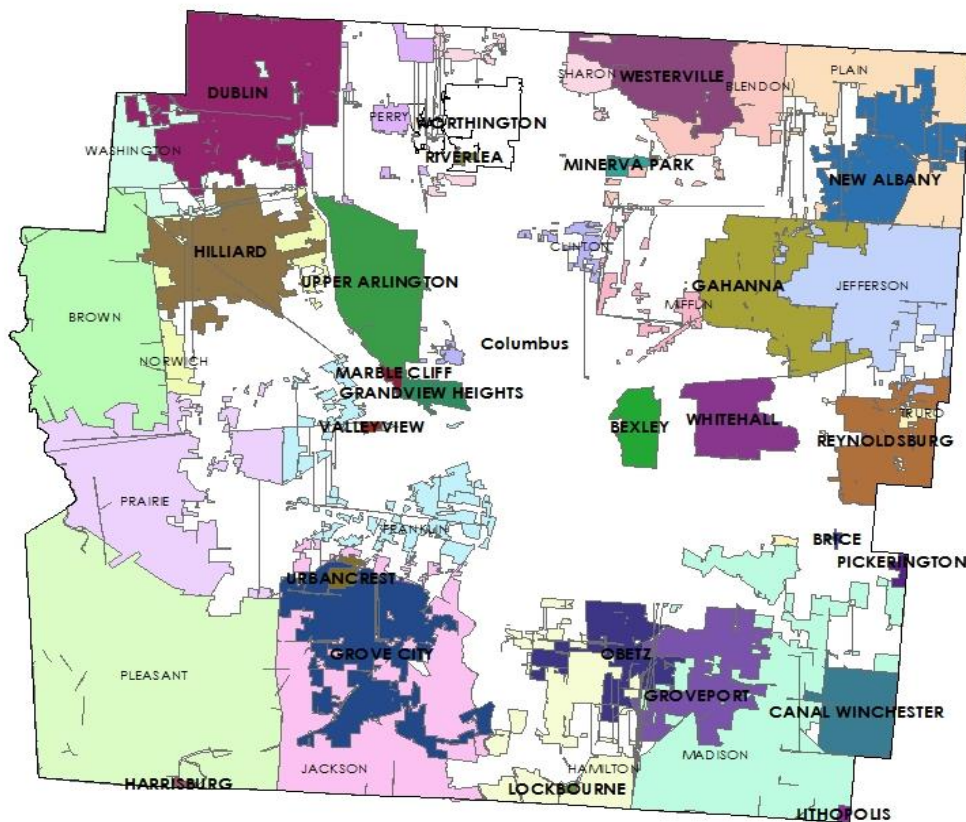

Franklin County has experienced growth over the past few decades. The county is slightly younger than Ohio and the nation, with a greater percentage of residents in the 18-64 year age range, and children under 5 years. Likewise, the area is experiencing the same trend as across the country with aging baby boomers. Franklin County has a slightly higher per capita income than Ohio while at the same time, has higher poverty rates for families and individuals. This reflects the diversity in the county with an urban inner city surrounded by suburban cities and townships. For more demographic information on Franklin County, please refer to Appendix A.

Franklin County is also home to a growing number of foreign-born, hailing from all corners of the globe. These new residents tend to live primarily in the more suburban parts of Columbus and Franklin County (See Appendix B. Community Research Partners, Columbus, Ohio).

Franklin County has a diverse economy based on education, government, insurance, banking, fashion, defense, aviation, food, clothes, logistics, steel, energy, medical research, health care, hospitality, retail, and technology. The county is home to the world's largest private research and development foundation, the Battelle Memorial Institute and The Ohio State University, the nation's largest academic campus. The County is headquarters to many notable businesses, including Nationwide Mutual Insurance Company, American Electric Power, Limited Brands, Cardinal Health and Wendy's corporation. There are four major hospital systems and seventeen natural area (metro) parks within the county with numerous urban greenways. Franklin County has an abundance of resources with energetic and committed communities to improve health and wellness.

Franklin County Public Health Jurisdictions

Franklin County Public Health Overview

Vision Statement

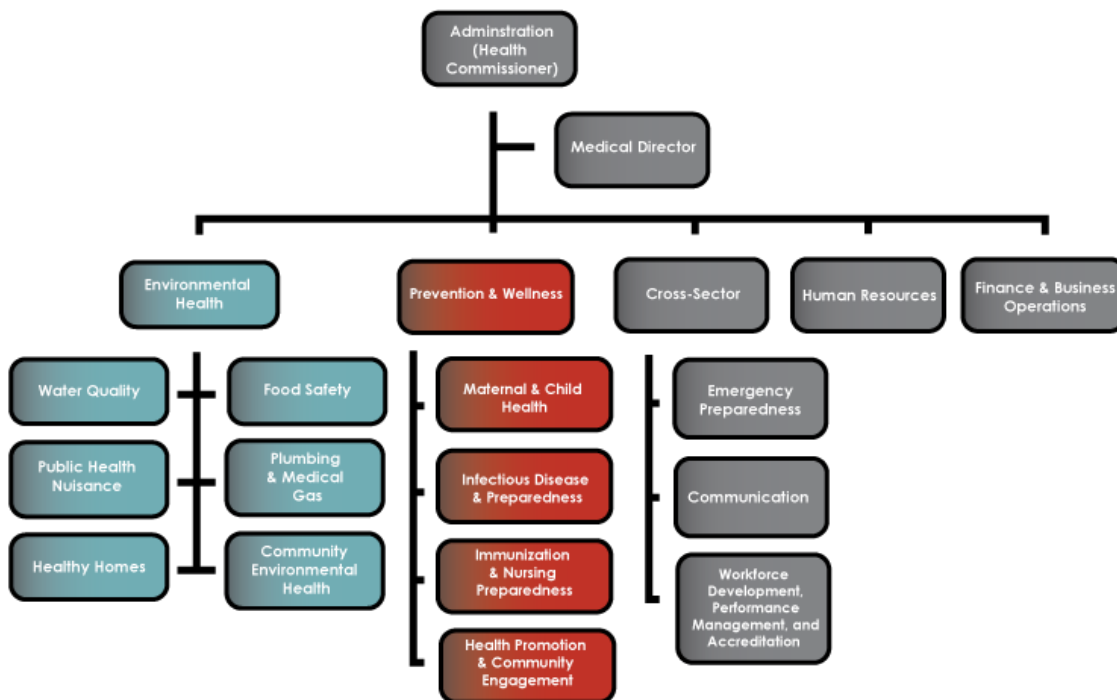

Franklin County Public Health leads our communities in achieving optimal health for all.

Mission

Franklin County Public Health improves the health of our communities by preventing disease, promoting healthy living and protecting against public health threats through education, policies, programs, and partnerships.

FCPH Structure

Figure 4: FCPH Organizational Chart

At Franklin County Public Health, the section that has been tasked with the planning, development and maintenance of the Community Health Improvement Plan is the Health Promotion and Community Engagement Section. This section focuses on examining and strengthening the health characteristics of the community through active partnerships. This section places a high value on active partnerships, because improving the health of the citizens of Franklin County is truly a shared responsibility.

Franklin County Public Health Community Health Improvement Plan Overview

A meaningful Community Health Improvement Plan must not only have stakeholder input, but it should also ensure that community members and organizations are active in doing the work of the plan. It is for this reason that Franklin County Public Health has been working to develop local groups in each of its jurisdictions. These groups are called Community Health Action Teams (CHATs). A CHAT is a group of local stakeholders in a specific jurisdiction (city, township or village) that work to improve the health of their community. At FCPH, we believe that nobody knows a community better than the people who live and work there. By partnering with key stakeholders across different sectors (i.e. schools, businesses, faith based groups), and working through a specific process, FCPH can more effectively address priority health issues and engage the larger community.

Franklin County Public Health began developing and piloting this initiative in early 2014. The first CHAT started in the city of Whitehall. Since then CHAT groups have also been started in Prairie Township, Hamilton Township and Obetz areas. FCPH is currently working to expand CHAT groups in the communities of Hilliard, Grandview Heights, and Marble Cliff. It is our intent that each jurisdiction have a diverse, engaged and functioning CHAT in their community.

During 2014 – 2018, Franklin County Public Health will focus its health improvement planning efforts into two areas of development:

1. Facilitate and support the local priority health goals of the current CHATs
2. Build the infrastructure/capacity at the local and county level
 - a. Expand the CHAT initiative to other jurisdictions
 - b. Develop the Franklin County Healthy Communities Coalition

In order to create and implement an effective health improvement plan, the correct systems must be established and nurtured at the local jurisdictional levels and county level. In order to effectively establish these systems, FCPH and its partners must commit to a process for collaboration and planning.

The CHIP Process

Franklin County Public Health's Community Health Improvement Plan involves a proven process model known as MAP-IT (Mobilize, Assess, Plan, Implement, and Track). The MAP-IT model is a guide for program planning developed by Healthy People 2020. This process is useful in planning and evaluating public health interventions and initiatives. By using the MAP-IT process, a group can more effectively:

- Engage and mobilize partners.
- Work with stakeholders to assess the strengths and needs of the community.
- Create and implement the Community Health Improvement Plan
- Track the community's progress

In addition to the MAP-IT process, FCPH has also adapted a framework known as Collective Impact. Collective Impact is a newer approach to addressing societal issues. It works to bring together multiple stakeholders and organizations to coordinate efforts and work together around a clearly defined goal. By bringing different sectors together, communities can make more meaningful and sustainable progress on social issues.

Collective impact offers a realistic paradigm to create lasting large-scale change for social progress. Collective Impact is more than just a collaboration, network or partnership; but rather a different approach that insists upon five conditions that produces true alignment and could potentially lead to powerful results. The five conditions of collective impact are listed in the figure below.

Figure 5: The Five Conditions of Collective Impact

The Five Conditions of Collective Impact

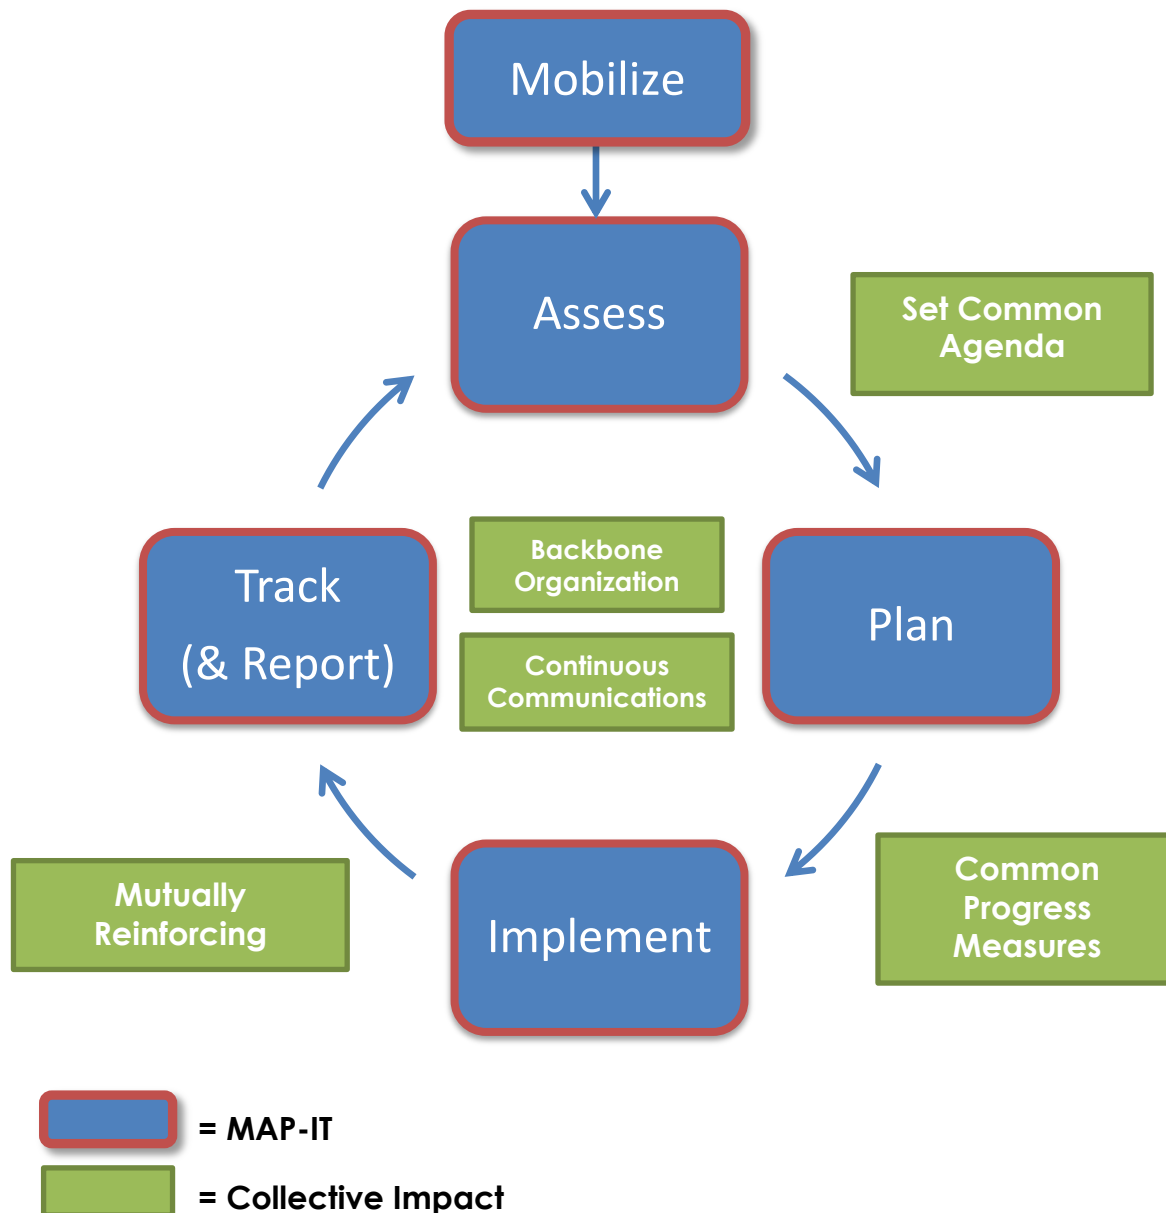

Common Agenda	All participants have a shared vision for change including a common understanding of the problem and a joint approach to solving it through agreed upon actions.
Shared Measurement	Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable.
Mutually Reinforcing Activities	Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action.
Continuous Communication	Consistent and open communication is needed across the many players to build trust, assure mutual objectives, and create common motivation.
Backbone Support	Creating and managing collective impact requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and coordinate participating organizations and agencies.

Source:

Channeling Change: Making Collective Impact Work, by Hanleybrown, Kanya, Kramer. *Stanford Social Innovation Review* 2012

Both the MAP-IT process and the Collective Impact framework offer important guidance in the building of dynamic community coalitions, creating clarity, and health planning. Because of the valuable contributions of this process and framework, FCPH staff have taken the MAP-IT Process and infused it with the Collective Impact approach. By infusing the MAP-IT Process with the Collective Impact Framework, Franklin County Public Health staff are establishing a much more comprehensive planning and community engagement approach.

Figure 6: MAP-IT Process with Collective Impact Framework

Franklin County Public Health’s Health Improvement Plan Strategy

In order to achieve successful health outcomes in Franklin County, it is necessary for the public health department to develop a smart and meaningful strategy. Part of this strategy must include developing strong and active partnerships with our communities in order to ensure stakeholder input and shared responsibility.

The 2014 – 2018 FCPH Community Health Improvement plan will focus on engaging and mobilizing community partners; and building the necessary systems and infrastructure in each of our jurisdictions. Our health improvement plan encompasses the following strategies:

A. Further development and support of our established Community Health Action Teams

*Franklin County Public Health currently has Community Health Action Teams in three of its jurisdictions:

1) Whitehall (Appendix C)

- **Summary Statement:**

The Community Health Action Team in Whitehall first began meeting in April 2014. The Whitehall CHAT is made up of many different sectors of the community (i.e. City Government, Schools, Fire Department, Faith based organizations, non-profit and for profit entities). The group has identified access to primary care as being the primary health issue for the community. The goal of the Whitehall CHAT is to “Increase the number of people in Whitehall with a usual and ongoing source of primary healthcare.” The team will start with a focus on women. For more information on the objectives, activities, timeframes and target measurements, please see the CHAT Implementation plan for Whitehall, Appendix C.

Current Step in the MAP-IT Process:

Mobilize | Assess | **Plan** | Implement | Track

- **Data and Indicators**

Data/Indicator	Current Measurement			2018 Target Whitehall
	Whitehall	Franklin County	Ohio	
*Whitehall EMS Request for Services (2013)	7000	Unavailable	Unavailable	6,300 (10% decrease)
** Percent Uninsured Population	22.34%	13.3%	11.59%	0% Healthy People 2020 Target
*** Lack of a Consistent Source of Primary Care	21.15%	21.15%	18.65%	16.1% Healthy People 2020 Target

Data Sources:

*Whitehall Fire Department

** US Census Bureau, American Community Survey

***Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System.

▪ **National and State Objectives Alignment**

National Objectives Alignment

- A. Healthy People 2020
 - Access to Health Services (AHS)
 - AHS-3: Increase the proportion of persons with a usual primary care provider
- B. National Prevention Strategy
 - Clinical and Community Preventive Services
 - Recommendation #6: Enhance coordination and integration of clinical, behavioral, and complementary health strategies

State Objectives Alignment

Ohio Department of Health: Ohio's Plan to Prevent and Reduce Chronic Disease, 2014-2018

- Core Focus Area 3: Community-Clinical Linkages
 - Objective 3.3: By 2018, increase the number of community health worker (CHW) models being used to address chronic disease prevention and management.

2) Prairie Township (Appendix D)

▪ **Summary Statement**

The Community Health Action Team in Prairie Township began meeting in November 2014. The group has identified increasing physical activity among community members and increasing healthy eating behaviors as their priority health goal. The team will start with a focus on households (families). For more information on the objectives, activities, timeframes and target measurements, please see the CHAT Implementation Plan for Prairie Township, Appendix D.

Current Step in the MAP-IT Process:

Mobilize | Assess | **Plan** | Implement | Track

▪ **Data and Indicators**

Data/Indicator	Current Measurement			2018 Target Prairie Township
	Prairie Township	Franklin County	Ohio	
*Obesity (% Adults with BMI > 30.0)	29.20%	29.10%	30.08%	28.70% <i>Ohio 2020 Target</i>
Percent Adults Overweight	35.62%	35.62%	35.80%	*30.62%
*Percent of Adults with no leisure time physical activity	23.10%	23.40%	25.48%	***18.10%
Percent of adults with inadequate Fruit & Vegetable Consumption	76.70%	76.70%	78.50%	*71.70%

Data Sources:

*Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion

**Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System

***2018 Target measurements for Prairie Township correlate to targets set in "Ohio's Plan to Prevent and Reduce Chronic Disease, 2014-2018."

▪ Nation and State Objectives Alignment

National Objectives Alignment

A. Healthy People 2020

- Physical Activity (PA)
 - PA-1: Reduce the proportion of adults who engage in no leisure-time physical activity
- Nutrition and Weight Status (NWS)
 - NWS-8: Increase the proportion of adults who are at a healthy weight
 - NWS-9: Reduce the proportion of adults who are obese
 - NWS-13: Reduce household food insecurity and in doing so reduce hunger
 - NWS-14: Increase the contribution of fruits to the diets of the population aged 2 years and older
 - NWS-15: Increase the variety and contribution of vegetables to the diets of the population aged 2 years and older
 - NWS-16: Increase the contribution of whole grains to the diets of the population aged 2 years and older
 - NWS-17: Reduce consumption of calories from solid fats and added sugars in the population aged 2 years and older

B. National Prevention Strategy

- Active Living
 - Recommendation #2: Promote and strengthen school and early learning policies and programs that increase physical activity.
 - Recommendation #3: Facilitate access to safe, accessible, and affordable places for physical activity.
- Healthy Eating
 - Recommendation #1: Increase access to healthy and affordable foods in communities.
 - Recommendation #3: Improve nutritional quality of the food supply.
 - Recommendation #4: Help people recognize and make healthy food and beverage choices.

State Objectives Alignment

Ohio Department of Health: Ohio's Plan to Prevent and Reduce Chronic Disease, 2014-2018

- Core Focus Area 1: Environmental Approaches
 - Objective 1.11: By 2018, increase the percent of Ohio farmers' markets that accept nutrition assistance benefits, including electronic benefit transfers (EBT), or vouchers for Supplemental Nutrition Assistance Program (SNAP) and Women, Infants and Children (WIC) Farmers' Market Nutrition Program (WIC FMNP).
- Core Focus Area 3: Community-Clinical Linkages
 - Objective 3.3: By 2018, increase the number of community health worker (CHW) models being used to address chronic disease prevention and management.

3) Hamilton Township/Obetz (Appendix E)

- Summary Statement

The first step in developing a Community Health Action Team is mobilizing key stakeholders in the community. In the Hamilton Township and Obetz areas, there is already a multi-sector, community serving coalition in existence. This group is the Community Partners of Southern Franklin County. This group first came together in the fall of 2002. The purpose of the Community Partners is to support education in the community by focusing on building relationships among members, identifying existing resources, and developing a plan to meet identified needs. As a result, the Community Partners have provided mentors, tutors, volunteers, assistance to families in need, literacy classes for adults, annual leadership seminars, space for meetings and classes, and a network among members. The Community Partners became an official nonprofit organization in August 2006.

In September of 2014, staff from Franklin County Public Health attended a Community Partners monthly meeting to discuss the CHAT initiative and to determine if the Community Partners of Southern Franklin County would have interest in collaborating and adding a community health focus to the group's projects and initiatives. This proposal was accepted by the group and Franklin County Public Health has since been a contributing member of the Community Partners.

The group has identified Health Promotion as their priority health goal. The team will focus on incorporating health promotion activities at current community partners events. This group will also begin looking at various health data and indicators for the community in order to narrow their focus and gain clarity around the priority health goal. For more information on the objectives, activities, timeframes and target measurements, please see the CHAT Implementation Plan for Hamilton Township and Obetz, Appendix E.

Current Step in the MAP-IT Process:

Mobilize | **Assess** | Plan | Implement | Track

- **Data and Indicators**

Since the Community Partners of Southern Franklin County are still in the Assess Phase, a specific priority health goal has not been identified. Once the priority health goal is selected, data and indicators will be identified in order to track and report progress.

- **Nation and State Objectives Alignment**

Since the Community Partners of Southern Franklin County are still in the Assess Phase, a specific priority health goal has not been identified. Once the priority health goal is selected, national and state objectives will be identified in order to ensure alignment these important health priorities.

B. Expansion of our Community Health Action Teams (Appendix F)

During 2015, FCPH will work to establish two new community health action teams in addition to the ones listed above. By December 2015, the Health Promotion and Community Engagement Staff will:

- 1) Establish the Hilliard, Grandview Heights/Marble Cliff CHATs
- 2) Identify Communities for expansion from 2016 – 2018.

C. Development of the Franklin County Healthy Communities Coalition (Appendix F)

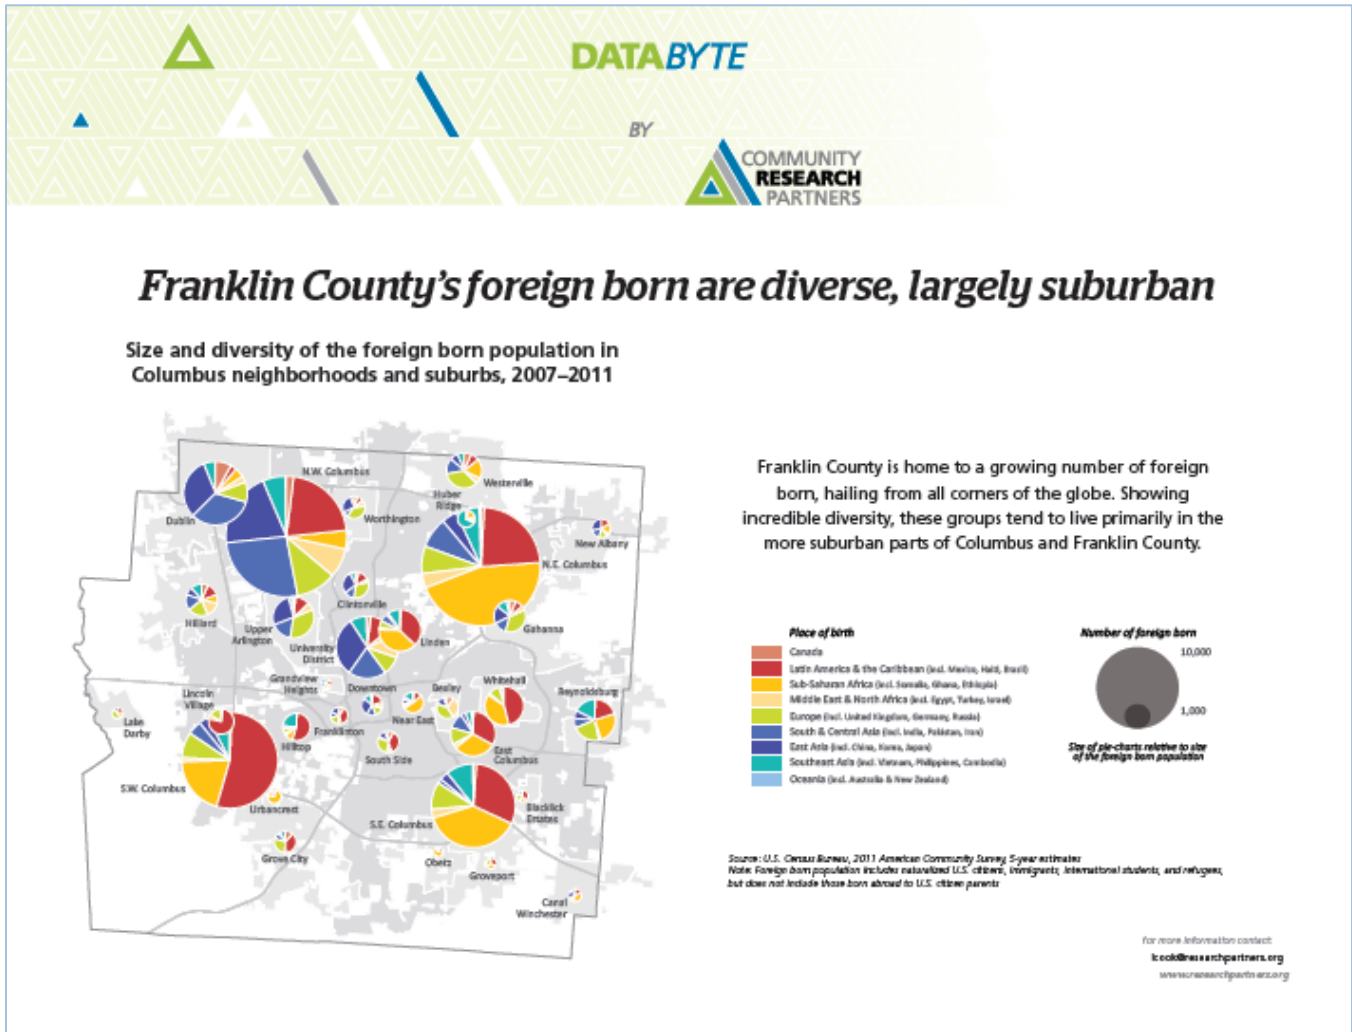

During 2015, FCPH will begin the design of the Franklin County Healthy Communities Coalition. It is the vision of FCPH that this coalition is made up of representatives of each Community Health Action Team, Jurisdictions that have health and Wellness Coalitions similar to the CHATs (i.e. Westerville), and larger non-profits and agencies (i.e. YMCA of Central Ohio, Ohio Health, Ohio Health Action Council, etc.). The purpose of this coalition will be for shared learning, collaboration and networking between community representatives, organizations and agencies. The goal is to hold the first Franklin County Healthy Communities Coalition during the first quarter of 2016.

APPENDIX A: Franklin County, Ohio and National Demographics for Selected Indicators

		Franklin County	Ohio	United States
	Total Population	1,163,414	11,536,504	308,745,538
Age	Under 5 Years	7.10%	6.20%	6.50%
	5-17 Years	16.80%	17.40%	17.50%
	18-64 Years	66.10%	62.30%	62.90%
	65 Years and Over	14.10%	14.10%	13.00%
Race	White	71.80%	84.50%	74.80%
	African American	23.10%	13.40%	13.60%
	American Indian/Alaska Native	1.00%	0.80%	1.70%
	Asian	4.60%	2.10%	5.60%
	Native Hawaiian/Other Pacific Islander	0.20%	0.10%	0.40%
	Other	2.70%	1.40%	7.00%
Ethnicity	Hispanic or Latino (of any race)	4.80%	3.10%	16.30%
Gender	Male	48.70%	48.80%	49.20%
	Female	51.30%	51.20%	50.80%
Income	Per Capita Income	\$27,002	\$24,830	\$27,041
	Median Household Income	\$49,041	\$47,144	\$51,425
	Mean Household Income	\$65,006	\$61,506	\$70,096
Poverty Status	Families Below Poverty Level	11.40%	10.00%	9.90%

Whitehall CHAT Improvement Strategies:

Priority Health Goal:	Increase the number of people in Whitehall with a usual and ongoing source of primary healthcare.	
Priority Population:	Women	
Timeframe:	April 2015 – October 2015	
Objective	Activities	Who is Responsible
Whitehall CHAT will implement the following activities in the next 3-6 months	<ul style="list-style-type: none"> • Host a coalition of community health workers (CHW). Examine use of CHWs in Whitehall and identify opportunities for use of CHWs in the community. Opportunity for shared learning between CHWs. • Raise awareness and provide education on the value of regular source of primary care. 	<ul style="list-style-type: none"> • CHW workgroup • Education and Awareness workgroup
Timeframe:	November 2015 – December 2018	
Objective	Activities	Who is Responsible
Whitehall CHAT will implement the following activities in the next 6-12 months	<ul style="list-style-type: none"> • Link mobile health services with existing community events. • Link health education fairs with existing community events. • Provide incentives to participate in regular healthcare. • Reduce transportation barriers by providing bus passes. • Organize a community based solution to reduce transportation barriers. • Engage COTA in forum to improve service and ways to make busses more family-friendly. • Engage Medicaid managed care organizations to improve use of transportation benefits. 	<ul style="list-style-type: none"> • TBD

Revised: 4/20/2015

Appendix D: Prairie Township CHAT Implementation Plan

Community Health Action Team Implementation Plan

Community Initiative: Prairie Township CHAT

Collective Purpose: “The Prairie Township CHAT will examine, educate, and provide opportunities to improve the health of people in our community.”

Strategic Partnerships - Prairie Township CHAT Partners:

- Doctors Hospital
- Franklin County Public Health
- Prairie Township Fire Department
- Southwest Public Library
- Franklin County Sheriff's Office
- Ethiopian Tewahedo Social Services
- Prairie Township Administration
- South-Western City Schools
- St. Marks United Methodist Church

Data and Indicators:

Data/Indicator	Current Measurement			2018 Target
	Prairie Township	Franklin County	Ohio	Prairie Township
*Obesity (% Adults with BMI > 30.0)	29.20%	29.10%	30.08%	28.70% <i>Ohio 2020 Target</i>
Percent Adults Overweight	35.62%	35.62%	35.80%	*30.62%
*Percent of Adults with no leisure time physical activity	23.10%	23.40%	25.48%	***18.10%
Percent of adults with inadequate Fruit & Vegetable Consumption	76.70%	76.70%	78.50%	*71.70%

Data Sources:

*Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion

**Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System

***2018 Target measurements for Prairie Township correlate to targets set in “Ohio’s Plan to Prevent and Reduce Chronic Disease. 2014-2018.”

Prairie Township CHAT Improvement Strategies:

Priority Health Goal:	Increasing physical activity among community members and increasing healthy eating behaviors	
Priority Population:	Families; including households and non-traditional families.	
Timeframe:	April 2015 – October 2015	
Objective	Activities	Who is Responsible
Prairie Township CHAT will implement the following activities in the next 3-6 months.	<ul style="list-style-type: none"> • Work with mid-Ohio food bank to coordinate and host a produce distribution sites in Prairie Township. • Provide nutrition education and healthy cooking demonstrations at the produce distribution sites through various organizations (i.e. OSU Extension, Local Matters). 	<ul style="list-style-type: none"> • Produce Distribution Workgroup • Education workgroup
Timeframe:	November 2015 – December 2018	
Objective	Activities	Who is Responsible
Prairie Township CHAT will implement the following activities in the next 6-12 months.	<ul style="list-style-type: none"> • Develop a cookbook with recipes from community members. • Recruit community members to volunteer and provide physical activity and healthy eating education and support at community events. • Cooking demonstrations (“Dream Dinners”) and meal preparation. • Community health scavenger hunt. 	<ul style="list-style-type: none"> • TBD

Appendix E: Hamilton Township/Obetz CHAT Implementation Plan

Community Health Action Team Implementation Plan

Community Initiative: Hamilton Township/Obetz CHAT

Collective Purpose: *Purpose statement of the Community Partners of Southern Franklin County:

“Having our finger on the **P.U.L.S.E.** of the community.”

People Matter (quality relationships, communications, building community, cooperation, mutual trust, individual/family/entities.)

Utimize resources (networking, working together, support one another)

Leadership through influence (growth, responsibility, realistic goals)

Serving the community (educating the community by/through..., involvement, meaningful work, solving community problems, meeting their need, responsibility.)

Excellence (in all things)

Strategic Partnerships - Community Partners of Southern Franklin County Partners:

- Columbus Regional Airport Authority
- Focus Learning Academy
- Girl Scouts
- Hamilton Local School District
- KIDSCONnect
- Nationwide Insurance
- South High Branch Library
- Eastland-Fairfield Career & Technical Schools
- Franklin County Public Health
- Grace Ministries
- Hoover YMCA Park
- Leave A Mark Church
- Ponderosa Restaurant

Data and Indicators:

Since the Community Partners of Southern Franklin County are still in the Assess Phase, a specific priority health goal has not been identified. Once the priority health goal is selected, data and indicators will be identified in order to track and report progress.

Hamilton Township/Obetz CHAT Improvement Strategies:

Priority Health Goal:	Promoting healthy behaviors and healthy living	
Priority Population:	Community members of Hamilton Township & Village of Obetz	
Timeframe:	April 2015 – October 2015	
Objective	Activities	Who is Responsible
Prairie Township CHAT will assess the health needs of the community and gain clarity around the priority health goal.	<ul style="list-style-type: none"> • Create a community health profile for Hamilton Township and Village of Obetz to share data with the Community Partners of Southern Franklin County. • Use data in the health profile to narrow the focus of the priority health goal. 	<ul style="list-style-type: none"> • Franklin County Public Health staff • Community Partners
